Rupiero

— budgeting in two currencies

A ledger-style money app for a life split between euros and rupiah.

EUR IDR · Android · offline-first

Two currencies, never mixed

EUR and IDR balances side by side, with an ≈ total at the ECB rate. Follows light and dark mode.

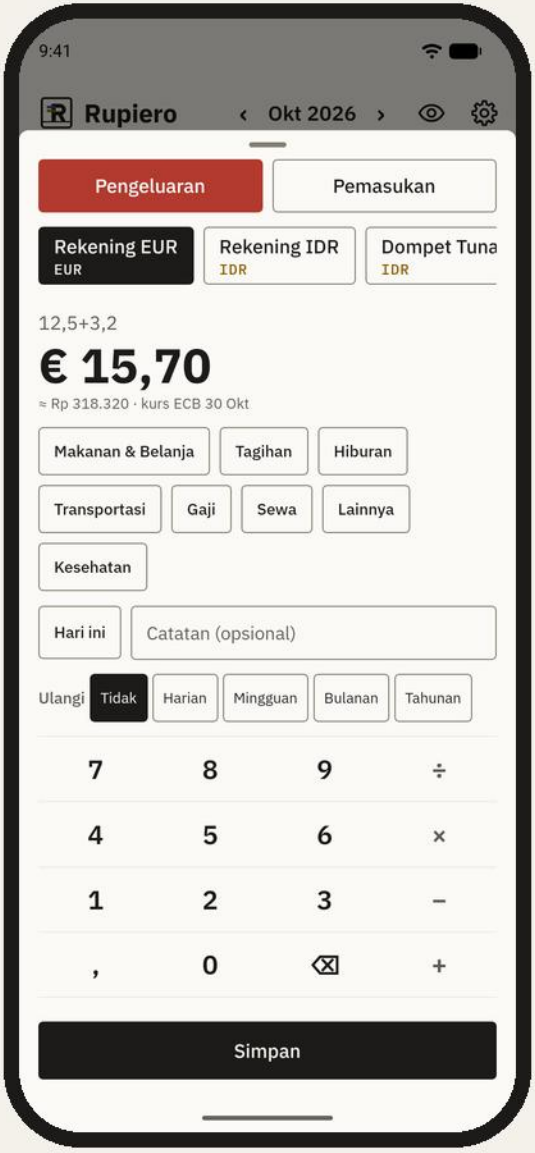

Light

Dark

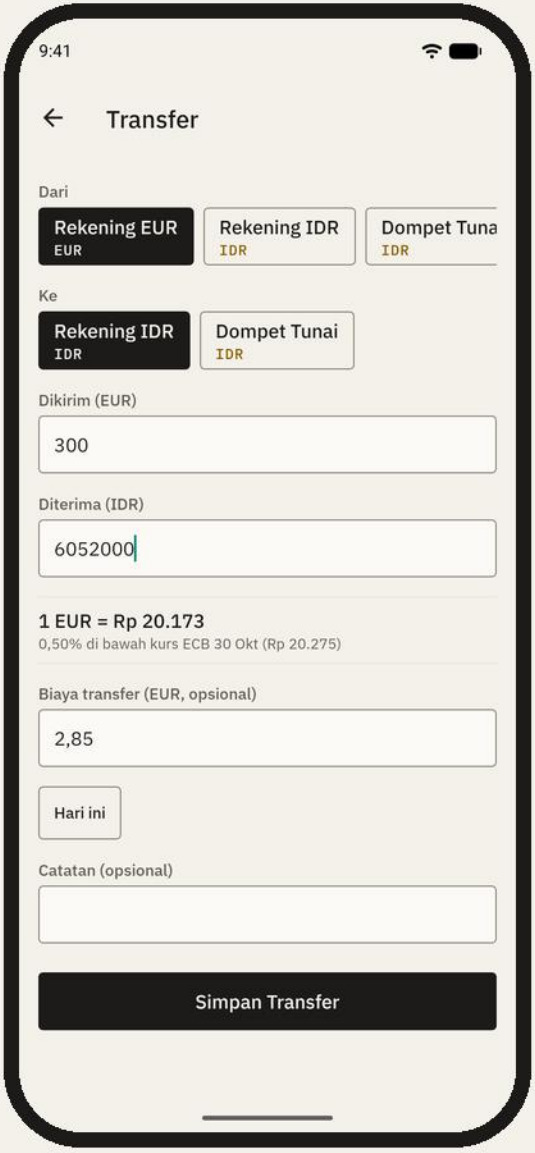

Add a transaction in seconds

A keypad with a built-in calculator: 12,5 + 3,2 → €15,70, previewed in rupiah as you type.

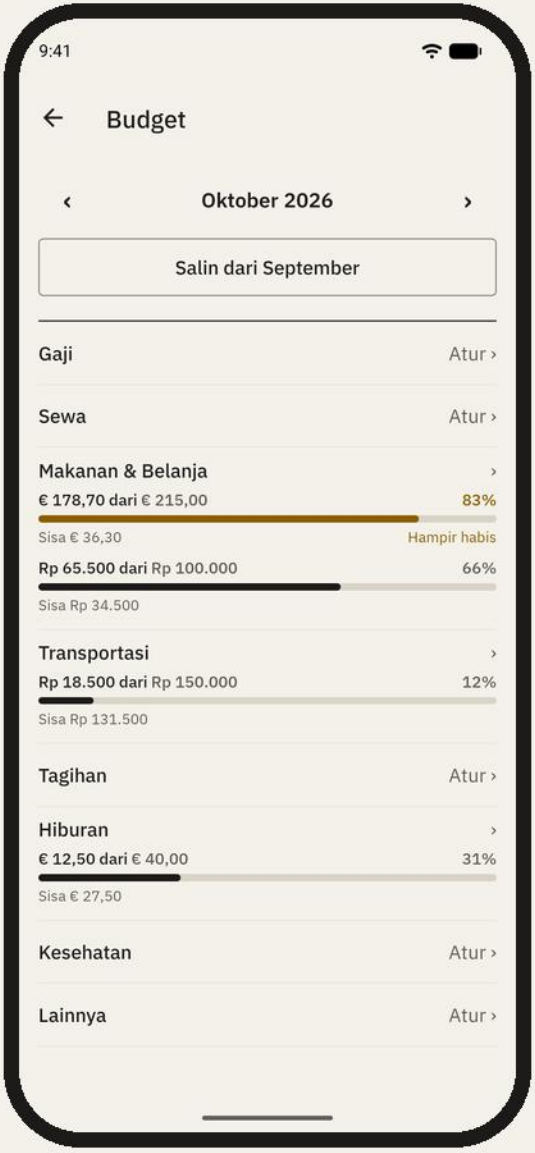

Know your real exchange rate

Each transfer shows the rate you actually got, how it compares to the ECB reference, and the fee.

Budgets that warn early

Per category, per month, per currency. Amber from 80 %, red once you go over.

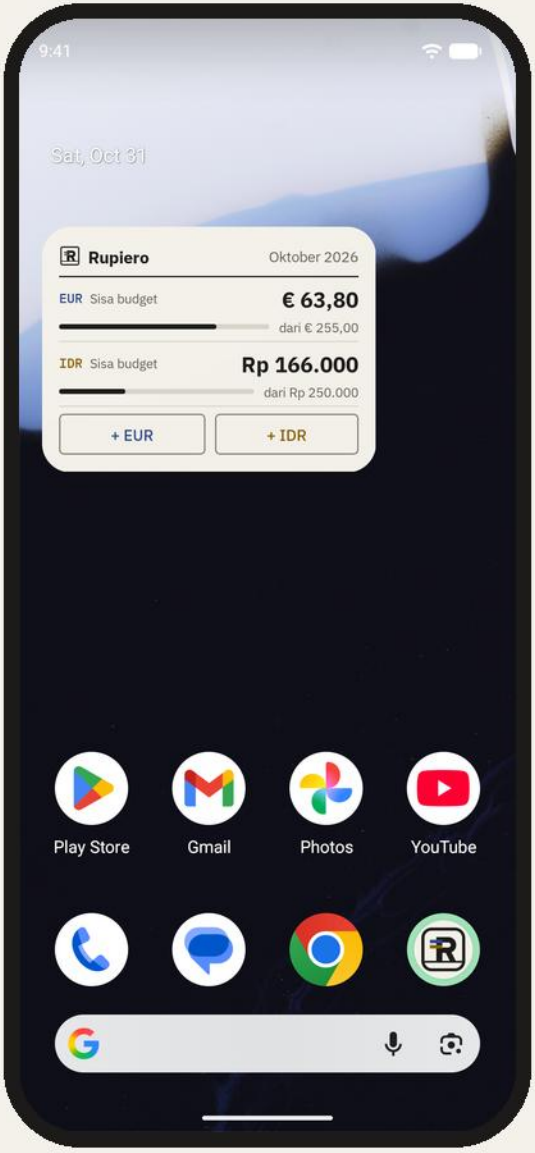

See where the money goes

Spending by category and a six-month trend, drawn in the same ledger style.

Right on your home screen

Remaining budget per currency and one-tap quick add for EUR and IDR.

Private when you need it

One tap on the eye hides every amount, in the app and optionally in the widget.
